RENEGAUGE™

INTRODUCING AN ALL-NEW AMERICAN-MADE SEMI-AUTO SHOTGUN FROM SAVAGE

ADJUSTABLE LENGTH OF PULL AND COMB HEIGHT

Allow for a customized fit that enhances accuracy and comfort for each shooter. Included with each package are three recoil pads and 3 comb heights.

A shim kit is included to further adjust drop and cast for minute adjustments for each shooter.

STOCK ROD BUFFER

The stock rod buffer is designed to reduce felt recoil and extend the life of the action bar assembly.
(Patent pending)

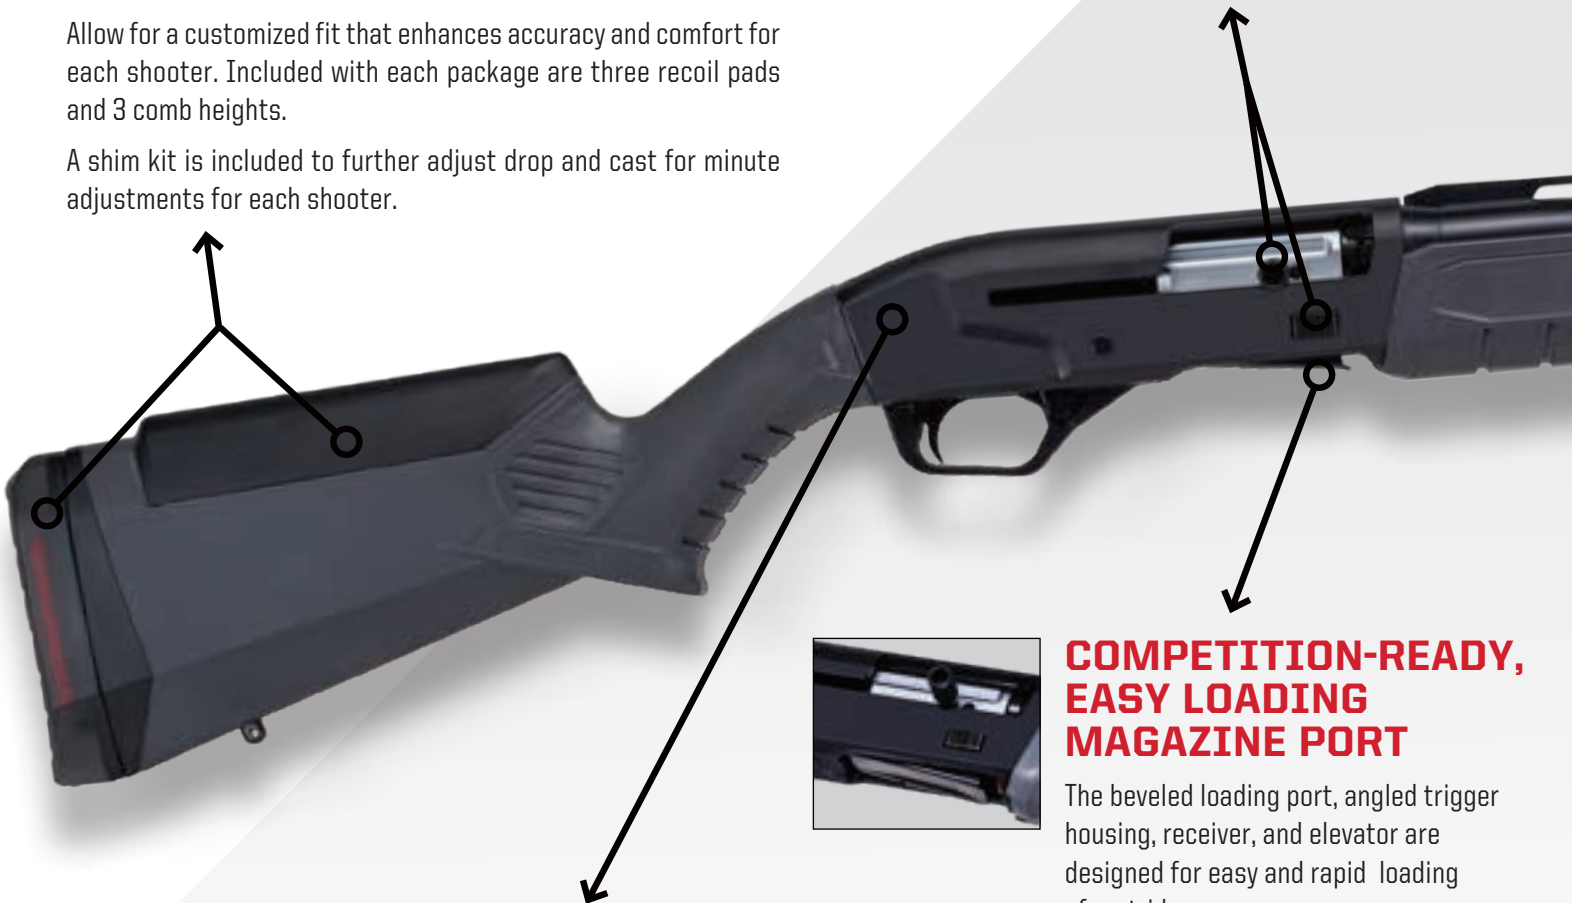

OVERSIZED CONTROLS

The charging handle and bolt release are larger than many factory shotguns for increased ease of use, particularly with gloves.

COMPETITION-READY, EASY LOADING MAGAZINE PORT

The beveled loading port, angled trigger housing, receiver, and elevator are designed for easy and rapid loading of cartridges.

THIS SEMI-AUTO WAS BUILT FOR RENEGADES.

D.R.I.V.

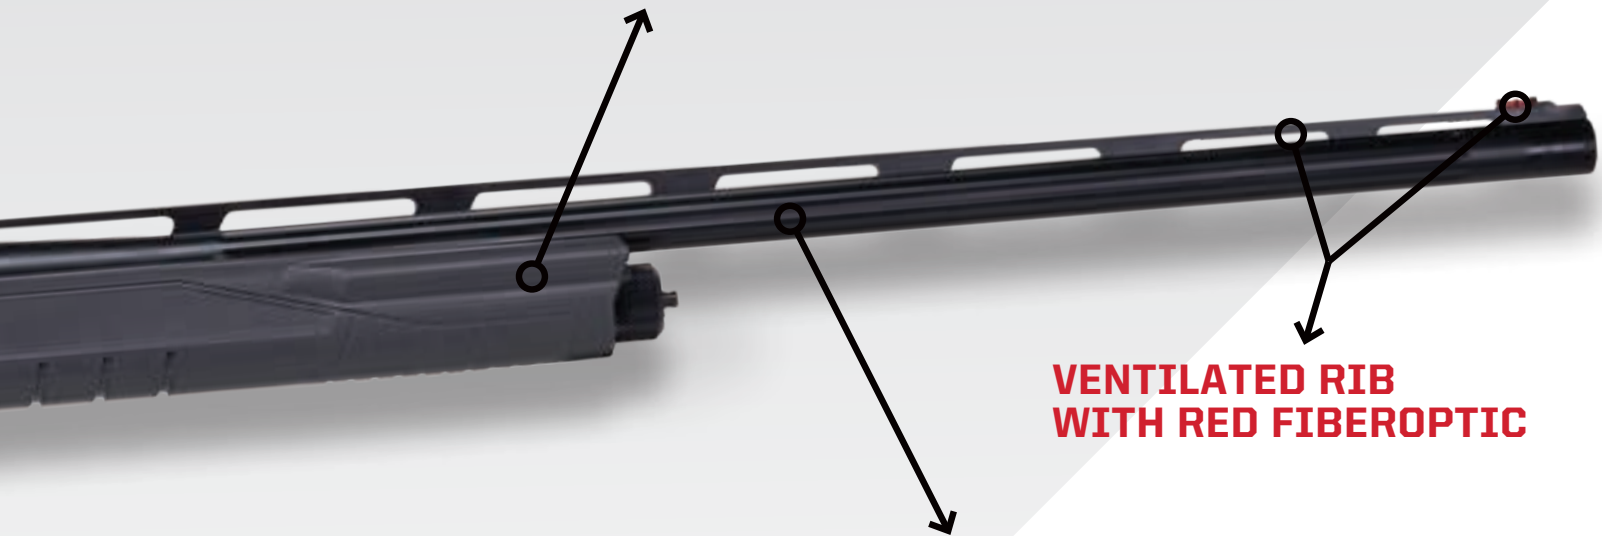

WHITE ARROW - Projectile exiting the firearm.
RED ARROW - Gas needed to cycle bolt carrier.
BLUE ARROW - Excess gas emitted.

D.R.I.V. GAS SYSTEM – DUAL REGULATING INLINE VALVE GAS SYSTEM

The first semi-automatic gas operation shotgun manufactured by Savage Arms. The patented self-regulating gas system allows high power and low power loads to cycle with the same consistency and reliability. Savage's dual-valve gas system is designed to emit excess gas, thereby maintaining optimal bolt carrier velocity across various loads.

Reliable operation from 3" Magnums down to low recoil 2 3/4" cartridges.

VENTILATED RIB WITH RED FIBEROPTIC

MELONITE FINISH

Provides excellent corrosion-resistance and surface hardness.

Full-length fluting on the barrel provides 9% weight reduction, improves balance, and swing.

ONE-PIECE LIGHTWEIGHT BOLT CARRIER

The action bar assembly, including the pusher sleeve, is laser welded to the carrier for increased strength and ease of assembly and disassembly. These components are then chrome plated for enhanced functionality and ease of cleaning.

PERFORMANCE-DRIVEN INNOVATION

NOTE: AccuTrigger™ is shown red for emphasis. Actual color is silver. For more information, see video at: savagearms.com

1. ACCUTRIGGER™

Historically, it was virtually impossible to find a factory firearm with the crisp, light trigger that hunters and target shooters demanded. That all changed when Savage introduced the AccuTrigger™. The first-of-its-kind system is easily adjustable by the shooter, offers a light, clean pull with no creep, and prevents the firearm from discharging if jarred or dropped. These features have made the AccuTrigger the standard by which all modern triggers are judged.

The Savage AccuTrigger gives shooters the flexibility to set the trigger pull to their individual preferences without having to pay a gunsmith to adjust it. Even when adjusted to its lowest setting, the AccuTrigger is completely safe. When maintained and adjusted as intended, the AccuTrigger cannot accidentally discharge during normal use, even if it is jarred or dropped.

The integrated AccuRelease must be completely depressed for the rifle to fire. While the trigger is being pulled, the AccuRelease is intentionally depressed, which unblocks the sear and allows the rifle to discharge.

2. FLOATING BOLT HEAD

Because the Savage floating bolt head is designed to allow a few thousandths of an inch of movement, it can adjust itself for a perfect fit only typically found with hand-lapped locking lugs. This perfect fit ensures proper alignment between boltface, cartridge, and chamber.

3. ACCUSTOCK™ BEDDING

The energy released when a cartridge is fired creates a series of harmonic waves that travel the length of the barrel. The movement that accompanies these waves can affect how the bullet travels. That's why any rifle with respectable accuracy will have a firmly bedded action.

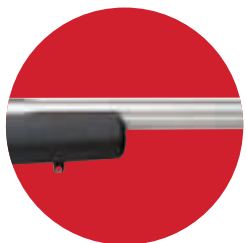

Traditionally, an action is secured to the stock by one or two screws that pull the action directly downward into the stock. This bedding method provides rigidity on a single linear plane—up and down.

The Savage AccuStock consists of a rigid rail system firmly embedded in the stock throughout the fore-end of the rifle. Rather than unidirectionally engaging the action at one or two points, the AccuStock engages the action three dimensionally along its entire length.

4. HEADSPACE CONTROL

One of the most critical dimensions of an accurate rifle is headspace. That's why we set this dimension by carefully threading our barrels into place with their matched action and bolt. These three components form a hand-fit, perfectly-matched set that is locked in place with a barrel locknut. We call it our "zero-tolerance" approach to headspace.

5. PRECISION BUTTON RIFLED BARRELS

There is a science to building an accurate barrel. The bulk of that science leans on specialized machinery, as well as experienced operators. Savage proudly employs both. Each and every Savage centerfire barrel—from the one going on a Team Savage competitor's F Class rifle to the one going on your kid's first deer rifle — is checked and, if needed, hand straightened by the same skilled craftsman.

YOUR CUSTOMIZED FIT TO

UNLOCK THE ADVANTAGE WITHIN YOU

The Savage AccuFit system on the Model 110 series features adjustments for length of pull and comb riser height. They work together to offer a gunsmith-level quality of fit for every size hunter in every hunting scenario. Customize without compromise with the Model 110 rifles.

Savage

ACCUFIT

MODEL 110 WITH ACCUFIT

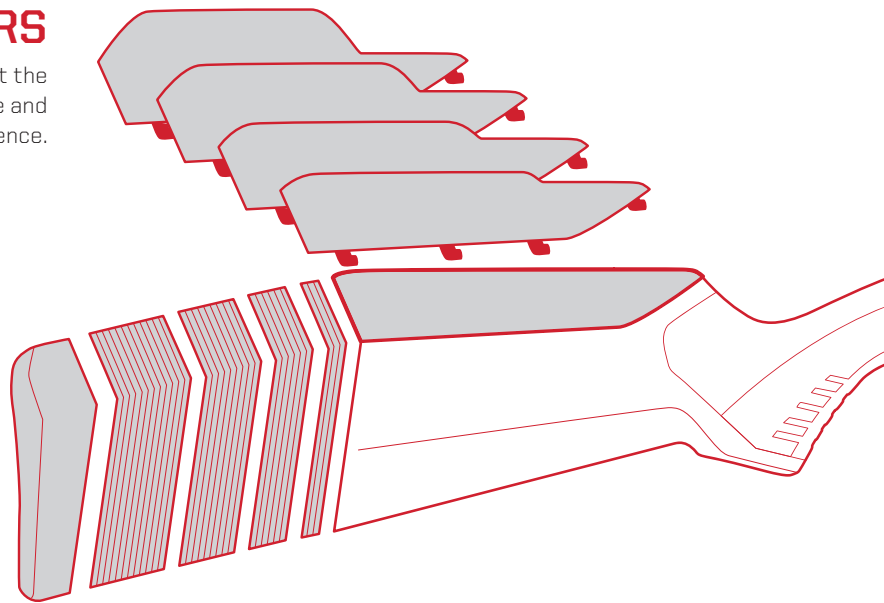

5 COMB RISERS

Five comb risers allow you to set the perfect height for your body size and shooting preference.

4 LENGTH OF PULL INSERTS

Add or remove up to four stock inserts to ensure the proper eye relief and establish a comfortable fit personalized to your body.

BETTER COMES STANDARD.

ADJUSTABLE RIFLES FOR ENHANCED ACCURACY

Some Savage customers order non-cataloged items to their own specifications. In certain cases, these specifications may exclude the AccuTrigger™.

SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

110 SERIES

Rifles in this series have many different features for many different purposes. But every one of them is built on the legendary Model 110 action, the most accurate factory action ever. The 110 Series has a fresh look and a full complement of improvements. Select models feature the AccuFit™ system, which lets you lock in a custom fit for fast target acquisition and enhanced accuracy.

AXIS SERIES

The AXIS is often a hunter's first exposure to the dependability and accuracy for which Savage is renowned. These budget-friendly rifles are American made Savage tack drivers.

How do we make the AXIS in the USA and still save you money? Some companies would simply design a cheaper rifle. We designed a more efficient way to make a Savage.

LONG RANGE SERIES

Savage's Long-Range series is purpose built for performance and efficiency. Each rifle features the legendary Model 110 action, the most accurate factory action. We put everything we have into arming these modern rifles with advanced technologies to give shooters the ultimate edge. Yet the modular designs of the Long-Range rifles allow an operator to customize their firearms to mission-specific demands by selecting from a virtually infinite array of aftermarket accessories.

LONG RANGE SERIES

PRECISION ACTIONS

There is a reason when gunsmiths build a custom rifle for a client they choose a Savage action as a base for the build. No other action gives the stiffness to maintain accuracy, and only Savage has the AccuTrigger™. Actions are available with both standard and .223 bolt heads and in three configurations: Right Bolt/Right Port, Right Bolt/Left Port, and Dual Port. The stainless Precision Target Actions also come with the Target AccuTrigger™, adjustable from 6 ounces to 2.5 pounds. Actions include the bolt assembly, AccuTrigger assembly, barrel locknut, recoil lug and trigger guard.

TARGET ACTIONS INCLUDE:

Bolt Assembly + Barrel Locknut + Recoil Lug Trigger Guard + TARGET AccuTrigger

PART #	BOLT HEAD	EJECTION PORT	MAG CAPACITY	MSRP
18183	223	STAINLESS - LEFT PORT	1	\$695
18182	STANDARD	STAINLESS - LEFT PORT	1	\$695
18185	223	STAINLESS - RIGHT PORT	1	\$695
18184	STANDARD	STAINLESS - RIGHT PORT	1	\$695
18636	223	STAINLESS - DUAL PORT	1	\$739
18637	STANDARD	STAINLESS - DUAL PORT	1	\$739

Some Savage customers order non-cataloged items to their own specifications. In certain cases, these specifications may exclude the AccuTrigger™.

VARMINTER SERIES

The Savage Varmint Series is Hell on prairie dogs and coyotes. With our revolutionary AccuTrigger, button-rifling, and free-floating barrels, these rifles offer the pinpoint precision needed for long shots across varied terrain. Unlike most manufacturers, Savage builds a variety of stock configurations. You can even select different twist rates in certain calibers to help stabilize different bullet weights.

Long distances and fickle prairie winds won't save any varmints that linger in your crosshairs.

A SERIES

Savage Arms™ continues its track record of innovation with the A-Series, the first high-performance semi-automatic rimfire system specifically designed for magnum cartridges. The A-Series delayed blow-back action provides safe, reliable operation with standard magnum loads. The hard chrome bolt, case-hardened receiver, 10-round rotary magazine and button-rifled barrel boost performance even further, while the user-adjustable AccuTrigger™ provides a crisp, light pull for the best possible accuracy.

B SERIES

Savage has added to its line of modern new firearms with the B17, B22 and B22 Magnum bolt-action Rimfire Rifles. The new line was conceived with the mindset that the better a gun fits you, the better you shoot it. To that end, the rifles offer a precision fit, thanks to an ergonomically designed stock, higher comb, top tang safety and target-style vertical pistol grip. Combined with a 10-round rotary magazine and user-adjustable AccuTrigger™, B Series Rifles are set for unbeatable accuracy.

MARK II SERIES

22 LR Rifles tend to run on the small side. But they are still a really big deal to us. That's why we have so many different configurations, from general-purpose plinkers to scoped packages, to every specialty configuration you can imagine. All have precision button-rifled barrels and most have an adjustable AccuTrigger. Why? Because to us, it's not "just a 22." It's a Savage.

MAGNUM SERIES

The 22 WMR cartridge featured in the Model 93 takes the old-fashioned rimfire round and gives it more punch. Savage Model 93 rifles give shooters a wide variety of 22 WMR configurations with the extras that have made Savage rimfires legendary.

With button rifled barrels and adjustable AccuTriggers, the Model 93s allow everyone from backwoods plinkers to target shooters to deliver the 22 WMR's punch with Savage Accuracy.

SINGLE-SHOT RIMFIRE SERIES

The best way to learn to shoot well is one shot at a time. Single-Shot Rimfire Rifles are perfect for new shooters all the way up to those who want to perfect the art. That's why our selection of single-shots are not toys. They have serious big-gun features like an adjustable AccuTrigger™, button-rifled barrels and even adjustable peep sights in some models. Sure, you've only got one shot, but with a Savage, one shot is all you need.

A man with a beard and sunglasses, wearing a green hoodie, is holding a black rifle with a scope and a magazine. The rifle is a Modern Savage Rifle. The background is a blurred outdoor setting with trees.

MSR SERIES

Savage Arms' next-generation semi-autos build on the legendary performance of the venerable AR platform. We call them Modern Savage Rifles.

The MSR family includes hard-hitting MSR 10s—lightweight, high-powered big game rifles for long-range domination. The lineup's MSR 15 models are what mil-spec M4 clones want to be when they grow up. These MSRs offer enhanced features, expanded caliber choices and updated designs. What most see as upgrades are standard features of the Modern Savage Rifle line.

MSR SERIES

MODEL 42

Way more than a novelty, the Model 42 Takedown shotgun-rifle combo is the ultimate survival, truck, camping and more gun! It breaks down with the simple push of one button and includes a Bug Out Bag so you can easily transport it anywhere.

MODEL 42 TAKEDOWN

Black Synthetic Stock + Blued Satin Finish + Shotgun-Rifle Combo + Open Sights
 Length of Pull = 13.5" / Compact Length of Pull = 12.5"

The Model 42 Takedown is an easy-to-use break-open combo gun that fires rimfire rounds from the top barrel and .410 bore shotgun shells from the bottom. The compact model's length-of-pull is short enough and its recoil is light enough that it makes a perfect starter gun for young shooters.

STEVENS SHOTGUNS

Our Stevens brand of firearms is, without a doubt, the definition of value. Stevens Shotguns are imported from overseas partners who work closely with Savage to provide great quality at affordable prices. The current selection offers pump shotguns in both field and security models. Looking for an over/under configuration? We have that too.

So, whether you're looking for a kid's first firearm or a way to affordably add a different platform to your collection, Stevens has you covered.
